Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): An enclosed applicator comprising an applicator with an applicator tip sealed along with a fluid within an elongated housing with an opening means near said applicator tip wherein said applicator and said elongated housing are formed as a single unit and wherein when the elongated housing is opened through the opening means, the applicator tip is exposed and the fluid in the elongated housing may be applied by the applicator tip to desired locations.

Claim 2 (original): An enclosed applicator as in claim 1, wherein said opening means is a twistoff cap, a screw-on cap, or a breakable reduced section.

Claim 3 (canceled)

Claim 4 (currently amended): An enclosed applicator as in claim 13, wherein said applicator and said elongated housing are formed by a blow molding process.

Claim 5 (canceled)

Claim 6 (canceled)

Claim 7 (currently amended): An enclosed applicator comprising an applicator with an applicator tip affixed to an elongated member sealed along with a fluid within an generally constant diameter elongated housing with an opening means near said applicator tip wherein

when the elongated housing is opened through the opening means, the applicator tip is exposed

and the fluid in the elongated housing may be applied by the applicator tip to desired locations.

Claim 8 (original): An enclosed applicator as in claim 7, wherein said applicator tip is made of

an absorbent material such as cotton, foam, or sponge.

Claim 9 (original): An enclosed applicator comprising an applicator with two applicator tips and

an enlarged section between the two applicator tips sealed along with a fluid within an elongated

housing with an opening means near each said applicator tip wherein when the elongated

housing is opened through the opening means, the applicator tips are exposed and the fluid in the

elongated housing may be applied by the applicator tips to desired locations.

Claim 10 (original): An enclosed applicator as in claim 9, wherein said applicator tips are made

of an absorbent material such as cotton, foam, or sponge.

Claim 11 (original): An enclosed applicator as in claim 9, wherein one of said applicator tips is

in the form of a thin pointed end.

Claim 12 (original): An enclosed applicator as in claim 9, wherein said enlarged section of the

applicator is affixed to the elongated housing and separates the elongated housing into two

separate sections each containing a different fluid.

Claim 13 (original): An enclosed applicator as in claim 9, wherein said enlarged section of the

applicator is retained within the elongated housing yet still allows fluid to flow between the two

ends of the elongated housing.
